CBS ArcSafe® Introduces RSA-154C for Siemens Vacu-Break® V2F & V7F Series PBS

Denton, Texas, August 22, 2017 – [CBS ArcSafe®](http://CBSArcSafe.com), a leading manufacturer of remote racking and switching solutions for low- and medium-voltage switchgear, introduces its remote switch actuator (RSA) for the Siemens Vacu-Break® V2F and V7F series of fusible panel units. The lightweight, portable CBS ArcSafe RSA-154C allows technicians to remotely close or trip a Siemens panelboard switch (PBS) from a safe distance of up to 300 feet, well outside the arc-flash boundary.

Installation and operation do not require any modifications to the existing electrical equipment, thanks to CBS ArcSafe's magnetic latching system. The RSA-154C is compatible with Siemens V2F and V7F series of single- or twin-mounted 200 A switches with a height of 10 inches. Typical applications include small-percent motor loads, motor starting circuits, and feeder circuits with less than 10 kA available fault current. When compared to other arc-flash mitigation alternatives, the RSA-154C is a cost-effective solution for keeping operators safe.

Optional features include radio remote with a range of up to 300 feet, 24 V DC LED light, wireless video camera system with LCD monitor, and rugged protective case assembly. All RSA units are portable, fast, and easy to set up; offer mechanical and/or electrical safety protection; are adjustable to fit unique electrical equipment configurations; reduce the requirements for personal protection equipment; and meet NFPA 70E arc-flash safety compliance standard.

All CBS ArcSafe products are manufactured in the United States at our facility in Denton, Texas. For more information, visit CBSArcSafe.com or call 877-4-SAFETY.

About CBS ArcSafe

CBS ArcSafe offers the electrical industry's largest inventory of remote racking and switching solutions for low- and medium-voltage switchgear that do not require modification to existing equipment for operation and that allow technicians to operate equipment from a safe distance of up to 300 feet. All our equipment is manufactured in the United States at our Denton, Texas, manufacturing facility. CBS ArcSafe offers 24/7/365 emergency support and is happy to develop custom remote racking and switching solutions for customers. Learn more at CBSArcSafe.com or call toll-free at 877-4-SAFETY.
