CBS ArcSafe® Introduces RRS-3 ADVAC (CDP) for ABB ADVAC Vacuum Circuit Breakers

Denton, TX, July 10, 2018 – [CBS ArcSafe®](#), a leading manufacturer of remote racking and switching solutions for low- and medium-voltage switchgear, introduces its single-application remote racking solution (RRS) for ABB ADVAC vacuum circuit breakers with closing door application featuring interlock pushbutton. The lightweight, portable CBS ArcSafe RRS-3 ADVAC (CDP) allows technicians to remotely install and remove the circuit breaker from a safe distance of up to 300 feet while remaining stationed outside the arc-flash boundary.

The RRS-3 ADVAC (CDP) is a cost-effective solution for keeping operators safe when compared with arc-flash mitigation alternatives. Installation and operation do not require any modifications to the existing electrical equipment, thanks to CBS ArcSafe's magnetic latching system. The RRS-3 ADVAC (CDP) is compatible with all standard 5–15 kV ABB ADVAC circuit breakers featuring closed-door racking with pushbutton-style interlock.

Typical applications for the ABB ADVAC breaker include commercial, industrial, and service entrance applications to protect and switch main, feeders, and incoming lines with continuous ratings of 1200–3000 A.

Optional features include 25-foot extension cables, 24 V DC LED light, wireless video camera system with LCD monitor, and rugged protective case assembly. All RRS-3 units are portable, with fast and easy setup. They offer mechanical and/or electrical safety protection, adjust to fit unique electrical equipment configurations, reduce requirements for personal protection equipment, and meet NFPA 70E arc-flash safety compliance standards.

All CBS ArcSafe products are manufactured in the United States at our facility in Denton, TX. For more information, visit CBSArcSafe.com or call 877-4-SAFETY.

About CBS ArcSafe®

CBS ArcSafe offers the electrical industry's largest inventory of remote racking and switching solutions for low- and medium-voltage switchgear that do not require modification to existing equipment for operation and allow technicians to operate equipment from a safe distance of up to 300 feet. All our equipment is manufactured in the United States at our Denton, TX, facility. CBS ArcSafe offers 24/7/365 emergency support and is happy to develop custom remote racking and switching solutions for customers. Learn more at CBSArcSafe.com or call toll-free at 877-4-SAFETY.
