CBS ArcSafe® Introduces Redesigned RRS-3 HK for HK-Style Circuit Breakers from ABB, BBC, and ITE

Denton, TX, March 17, 2020 – [CBS ArcSafe®](http://CBSArcSafe.com), a leading manufacturer of remote racking and switching solutions for low- and medium-voltage switchgear, introduces its redesigned single-application remote racking solution (RRS) for HK-style circuit breakers from ABB, BBC, and ITE. The lightweight, portable CBS ArcSafe RRS-3 HK allows technicians to remotely install and remove circuit breakers from a safe distance of up to 300 feet away while remaining stationed outside the arc-flash boundary.

The latest generation RRS-3 HK has been transformed into a mobile, dolly-style racking unit that can be easily wheeled up to the breaker. Additionally, it features a convenient built-in tool holder. With the RRS-3 HK, the user is stationed outside the arc-flash boundary. A radio remote that can handle up to a 300-foot line-of-sight operation comes standard in select RRS-3 packages.

Installation and operation do not require any modifications to existing electrical equipment, thanks to CBS ArcSafe's magnetic latching system. The RRS-3 HK is compatible with HK-style circuit breakers (single height only, not stacked) manufactured by ABB, BBC, or ITE, with current ratings from 1200 to 3000 A. This system is not compatible with any HK-1000 models. HK-style circuit breakers are typically found in generation, chiller/HVAC, petrochemical, water/waste treatment, and pulp/paper applications.

Optional features include 25-foot pendant extensions, a 24 V DC LED light, a wireless video camera system with an LCD monitor, and a rugged protective case assembly. All RRS-3 units are portable, with fast and easy setup. They offer mechanical and/or electrical safety protection, adjust to fit unique electrical equipment configurations, reduce requirements for personal protection equipment, and meet NFPA 70E arc-flash safety compliance standards.

All CBS ArcSafe products are manufactured in the United States at our facilities in Denton, TX, and Charleston, WV. For more information, visit CBSArcSafe.com or call 877-4-SAFETY.

About CBS ArcSafe

CBS ArcSafe offers the electrical industry's largest inventory of remote racking and switching solutions for low- and medium-voltage switchgear. The systems operate without modification to existing electrical equipment and allow technicians to operate equipment from a safe distance of up to 300 feet away. All CBS ArcSafe equipment is manufactured in the United States at our Denton, TX, and Charleston, WV, facilities. CBS ArcSafe offers 24/7/365 emergency support and is happy to develop custom remote racking and switching solutions for customers. Learn more at CBSArcSafe.com or call us toll-free at 877-4-SAFETY.
